January 14, 2015 - I had a GX-24, about 9 years old, bought new from The Paper Ranch. On my computer, on which I've been using CutStudio all this time, there is an option to save the project to DVD, but it doesn't work. (I have another DVD, but I can't find a way to use it to run the DVD image with CutStudio.) I've tried on different drives and different OSes, but I can't get the feature to work. Is there anything I can do to make it work?
