AutoCAD 2.0 was released in 1985, and continued to be upgraded, with the latest version, AutoCAD 2012, released in July 2012. CAD software has become an essential tool for engineers, architects, designers, and project managers. It has replaced the drafting easel and pen and paper as the medium for design. History Microcomputer-based CAD software programs have been available for many years, such as CAD Pac, a desktop software system for the Commodore PET computer sold by Marlow Industries. Computer-aided drafting (CAD) systems for desktop computers and mainframe computers have also been available for many years. These programs tended to be proprietary and expensive. Early AutoCAD was one of the first CAD programs to run on a microcomputer with a graphics controller, and to do so in a vector format, rather than a raster (bitmap) format, and at a reasonable price. AutoCAD was first developed by a company called "Autodesk", which was founded in 1971. Unlike the original version of AutoCAD, which was based on the "Lotus 123" software, later versions were a Microsoft Windows application. AutoCAD 2007 released on August 17, 2007 included many new features including: blockouts, 3D models, support for printing in the three sizes; (letter, legal, and A4), dynamic xrefs, and the ability to import from Corel Draw, layers, palettes, libraries, and drawing templates. A developer beta version of AutoCAD 2010 was released in the second quarter of 2009, and the final version was released on November 22, 2009. The release includes, among other improvements: the ability to edit and manipulate 3D models; detailed layer management; on-screen editing for dynamic xrefs; the ability to import and export from Corel Draw; many import and export features for raster and vector images and 2D drawings; and many new collaborative and workflow features. AutoCAD 2010 also included a

completely redesigned user interface. In addition, it included features such as built-in templates for sheet metal, architectural, bridge, floor, and MEP drawings, and web viewing and file transfer.
